Arignar Anna Govt College, Attur
CGPA - 8.0

Bishop Heber College, Trichy
CGPA - 75.8%

Govt Boys Hr Sec School, Gangavalli
CGPA - 71.25%

LANGUAGES

- English
- Tamil

SUMMARY

Results-driven .NET Full Stack Developer with 3 years of experience in building and supporting enterprise applications using ASP.NET Core, C#, SQL Server, and Web APIs. Currently working at Binary Bot, handling development support, batch job monitoring, report generation, and database query optimization. Skilled in MVC, REST APIs, Entity Framework, and production issue resolution. Passionate about building scalable applications and improving system performance. Strong ability to analyze business requirements and deliver efficient, reliable solutions in a fast-paced environment.

WORK EXPERIENCE

May 2023- PRESENT

Binary Bot | Analyst

Project Description: FESTO Design is a web-based application used to manage interior and exterior design services for businesses and homeowners. It handles the complete project lifecycle including lead management, work orders, installation, billing, commissions, and reports, with multi-user access for Admin, Sales, Technical teams, and Customers.

ROLES AND RESPONSIBILITIES

- Analyzed business requirements and participated in requirement discussions with the team.
- Performed functional testing and regression testing for new features and enhancements.
- Created and executed test cases based on requirement documents.
- Logged and tracked defects using Azure DevOps and worked with developers to resolve issues.
- Validated batch jobs and report generation processes to ensure scheduled jobs run correctly.

Project Description: Staller-ICS System (Integrated Customer Service) is a web-based platform used to manage and analyze customer data to improve sales, product quality, and service efficiency. The application supports customer data management, service requests, multi-channel customer support, and report generation to help businesses understand customer needs and make better decisions.

ROLES AND RESPONSIBILITIES

- Assisted in development and maintenance of modules in the ICS System using C# and SQL Server.
- Handled minor bug fixes and small feature enhancements based on user requests.
- Wrote and executed SQL queries for data retrieval and report support.
- Supported the team in analyzing customer data and generating reports for business insights.
- Collaborated with developers to test and verify fixes before deployment.

TECHNOLOGIES USED

ASP .NET Core, C#, SQL Server, Cronz Scheduler(Crunz), REST APIs, Role-based authentication.
